Turkish Entrepreneurship Foundation was founded in April 2014. Founded by business people and opinion leaders who are aware of the importance of entrepreneurship and believe that it is the key to change, Turkish Entrepreneurship Foundation works with youth to advance the entrepreneurship culture and to make entrepreneurship a career alternative among young people.

The existing system in Turkey and the global entrepreneurship support mechanisms in the world consist of accelerators and further supports for those who have already decided to become entrepreneurs and who seek to transform ideas into business models and enter into the right market. To develop the entrepreneurship culture, however, you have to create an infrastructure and so as to do this, you have to start from the basics. At this point, the right place to start is the universities.

That’s why we as the Turkish Entrepreneurship Foundation, created our Fellow Program for university students. With our globally unique Fellow Program, we decided to focus on university students, who are open to taking risks, who stepped into being an individual and who are willing to create a change. With our 6-step scientific selection process, we select university students with a high entrepreneurship potential. Within the program, we give these young people the inspiration and the network that can change their lives, the chance to organize events to give back what they learned with others, the opportunity to be an intern at startups and companies and the highest scholarship in Turkey.

Turkish Entrepreneurship Foundation aims to create a perspective of “giveback” among young people. If the entrepreneur eventually shares the success s/he gained through the support of others with the community, then the success could be scaled and augmented. With this philosophy, we aim to organize a Giveback Gala night—which we held for the first time in 2016 — every year in order to foster the giveback culture and to increase awareness among young people and the entrepreneurship ecosystem.

Besides the Fellow Program, we are creating new brand and projects such as MappedinTurkey, CreateUp, Youngpreneurs and Start to reach wider crowds where we will be able to inspire not only young people but also Turkey as a whole. As the Turkish Entrepreneurship, we are the second families of our Fellows in the program and we want to be with them throughout their whole lives. We believe that thinking with a perspective of an entrepreneur would make the world a better place, thus we continue our work accordingly.
Entrepreneurship is a seriously increasing value in the whole world. The reason is simple: Successful entrepreneurs play a major role in the development of countries. The companies that entrepreneurs built are the companies that peak the employment of the last five years in countries such as the USA. Turkey’s entrepreneurship culture is in a fast changing period in the last five years. With education, we are in a trend through which we are changing the long term outlook of our country.

Turkish Entrepreneurship Foundation was founded in April 2014 for these reasons. Its purpose is not to head towards entrepreneurs (there already exists an ecosystem that does this). The main purpose is to encourage entrepreneurship among talented young people. A wide network of Board of Trustees and sponsors support it too. The Foundation awards the highest number of student scholarships in Turkey and it only uses its inspiration mechanism. So, every two months, it brings all the fellows together with a successful entrepreneur to listen to that entrepreneur’s detailed story. There is not a single way to become an entrepreneur. All the stories of successful entrepreneurs of today have a different beginning story. All of them passed through different paths. Fellows listening to these stories draw their own conclusions. Furthermore, stories told about entrepreneurship multiply. Turkish Entrepreneurship Foundation is the first and the only foundation that aims to develop the entrepreneurship culture in the world, in the long term.

In the 2015 selection process, we got more applications than we expected: 30,000 university students from more than 170 universities applied. In the end, we have chosen 50 new Fellows and started the second season of the Entrepreneurship Foundation. This is just another first step. If we think about five years from now, we can say that hundreds of Fellows will complete Entrepreneurship Foundation’s Fellow Program.

Making entrepreneurship a serious career alternative among young people is where we want to go. I would also like to point out that our fellows consist of 40 women and 40 men. In fact, Turkey, especially needs women entrepreneurs.

Year 2016 will be a year for Entrepreneurship Foundation to expand to the world. Our global collaborations and sponsors are increasing significantly. We will have events with our fellows both in Turkey and abroad. We are trying to send our fellows to important global organizations, conferences and all the events that inspire entrepreneurship in some way. For instance, we attended DLD Munich with our 2 fellows this year. I believe that having two young Turkish university students at a European conference where getting invited is the hardest is a beautiful thing for the foundation and for the country.

Besides this, we created an entrepreneurship blog called www.futureleadnow.com where 2 posts on average are being published every day. It’s a site with Turkish content and it has a high traffic. It’s pleasant that its frequent visitors are young people exclusively.

A country without any development in entrepreneurship is a country that has punished itself by standing on one foot. We would be really happy if we could make a little contribution to spreading entrepreneurship in Turkey.

I would like to thank all of our members of the Board of Trustees, our Board of Members, our individual and corporate sponsors, our General Manager, Mehru Ozturk Aygül, and her team for beginning this journey with me. Thanks to all of you, we came to this point in a short amount of time.
This year was the year where we carried out the first of many. Our Fellow Program exceeded the point of what we dreamed of when we first created it in 2014. We are empowered not just by our applicant number of 30,000 people but also by the entrepreneurship stories our 2014 and 2015 fellows are creating.

We have spent year 2015 to transform Fellow Program into a model by trying to build it on solid infrastructure. We strengthened the selection process and added another step to accurately evaluate 30,000 applications. We saw the impact created by our 2014 fellows on this years applications. Fellow Program’s main foundations come from investing in people. We will see the results of our investments in the long term not in the short term. We believe in the power of these young people who will change and improve the country with entrepreneurship.

Our 80 Fellows and alumni are slowly impacting the whole ecosystem with a multiplying effect, with their entrepreneurship experiences. Each and every one of them started a change around them with the inspiration they get and with the motivation of the giveback culture. Our fellows, now, know better about what they want and take steps to launch their ideas. They have already started solving a bunch of social problems from health to environment awareness. Our stories will increase from day to day and the entrepreneurship culture will develop.

Fellow Program will stay as the main program of the Entrepreneurship Foundation. Besides this, we will continue to give inspiration with the Start Academy—an entrepreneurship program for high schools by our two fellows, with Create Up—a project developed with Endeavor to spread the entrepreneurship culture in creative industries and with our Youngpreneurs events open to public. We also try to develop the giveback culture, especially with the events organized by our fellows. The impact and the meaning of what we do get more powerful when every fellow shares his/her own experiences. Entrepreneurship culture will impact all parts of the society with the increasing impact of inspiration stories shared.

2015 was the year where we strengthened our foundations, developed and strengthened our model. 2016 will be the year where besides growing with our Fellow Program, the Entrepreneurship Foundation becomes global with the new projects and new collaborations. The biggest architectures of where Entrepreneurship Foundation stands is our team, our Board Members who spend an extraordinarily amount of time and energy and our Board of Trustee Members. We are getting our power from our Fellows who inspire us every day. Entrepreneurship Foundation will continue building the future with their dreams, perspectives and ideas that fascinate us everyday.

The future belongs to those who believe in the beauty of their dreams.

Eleanor Roosevelt

</tbody>
</table>
With our Fellow Program which gets applications from all universities and majors in Turkey, we are investing in the potential of young people not in their ideas.

We select the university students to the Fellow Program with an innovative and a scientific selection process. Our 6-step selection process aims to determine the entrepreneurship potential within young people.

We believe that inspirational stories and network are the most important instruments for spreading the entrepreneurship culture. The beginning of change is when a fellow of ours says “I can do it too” after listening to an entrepreneur’s story with every detail. Our fellows become a part of a wide network by coming to the Fellow Up inspiration meeting every two months and having lunches with Board of Trustee Members.

6
CORE COMPONENTS
OF THE
FELLOW PROGRAM

WHAT DO FELLOW PROGRAM PROVIDE FOR THE SELECTED FELLOWS?

INSPIRATION
Fellows are listening to inspirational entrepreneur stories every two months at Fellow Up’s. It is mandatory to attend Fellow Up’s where they get a chance to listen unknown details.

NETWORK
Combining inspiration with network is a golden rule for entrepreneurship. Our fellows are becoming a part of a global network with the events they attend and the people they meet throughout the program.

SCHOLARSHIP
We invest in people not in ideas. We give a scholarship of 500 TL for 12 months in order to support our fellows’ attendance to the program and their personal developments.

WHAT DOES THE FELLOW PROGRAM EXPECT FROM FELLOWS?

ATTENDANCE
Most of the events within the Fellow Program are mandatory. Our fellows are only allowed to miss one Fellow Up event. After that, they are excluded from the program with the decision of our Board Members.

STARTUP AMBASSADORS
The program participants will act as “startup ambassadors” in their own universities in order to propagate the culture of entrepreneurship by creating a multiplier effect.

BLOG
As part of the Giveback culture, fellows are writing a minimum of 3 blog posts from their experiences including the events they attend.

Entrepreneurship Foundation is a place that shelter...
Every success that the world saw was once a dream. Entrepreneurship Foundation taught us that if we want to climb a tree, our aim should be to reach the stars.

It’s a dream producing a cute planet where productive people are living. It’s made of an inspirational atmosphere and its main component is giveback.

Entrepreneurship Foundation is a path full of togetherness.

It’s an adventure that we experience together.

Entrepreneurship Foundation is a family that brings excitement to life and makes us grow with sharing, with support to one another and with inspiration.

Entrepreneurship Foundation is a family that teaches me everything that I need to know to dream and make it come true.

Entrepreneurship Foundation is a family that gives me inspiration, that makes you think out of the box, that is my biggest luck and that makes me feel that it is always with me.

It’s home, its family, it’s friendship.

One’s life is colored with its imagination. Entrepreneurship Foundation provides us with unique colored pencils and lets us draw.

Entrepreneurship Foundation is the unity and harmony of different voices.

Our Projects

Mapped in Turkey
The purpose of this project is to create a sector map that includes entrepreneurship clubs, academicians, technology transfer offices, entrepreneurship centers, non-profit organizations, investors and incubation centers. This map will simplify the communication between students, academicians, entrepreneurship and incubation centers and investors.

Create Up!
The project was realized with the collaboration of Endeavor and Entrepreneurship Foundation, and with the grant of ISTKA (Istanbul Development Agency). It aims to encourage Design, Thinking and Entrepreneurship in Creative Industries. The objectives of this project are to increase the impact of Istanbul in creative industries, to bring it to a global competitor level with methods that help it achieve an entrepreneurship spirit and talent, to increase the delivery of products to both local and global markets and to contribute to the increase of corporate capacity.

Start
Start is a project designed by Entrepreneurship Foundation fellows Yusufcan Bozkus and Merve Toroslu. It is a project that aims to create entrepreneurship culture at high schools. Within the scope of the project, it is planned to give entrepreneurship training to a total of 10 high schools, 5 public 5 private. Besides these trainings, inspirational meetups are organized for high schools students and fellows with startups. The project is growing with startup tours and networking events.
Youngpreneurs is a trademark of Entrepreneurship Foundation for its public events. Fellows are using this name in all the events that they organize. Within the Global Entrepreneurship Week, they organized events in 8 cities and 28 universities. We also organized Youngpreneurs Open Day event for university and high school students in January 2016. We will launch Youngpreneurs TV in 2016 where there will be entrepreneur interviews held.
